ABOUT CHRONOTRAINS

Chronotrains is an interactive European rail map for discovering where a train journey could take you. Choose a city or station and explore destinations by travel time, including connections. Alongside the map, Chronotrains covers direct trains, night trains and places worth a short break.

EXPLORE THE STORY

How does Europe change when measured in train hours? Which places fit the time you have? Start with a city, compare its reachable destinations and follow the railway beyond the familiar stops.

ARTWORK AND INTERVIEWS

The press kit contains SVG and transparent PNG logos, light and dark variants, social formats, usage notes and copyable English/French descriptions. Contact the team for interviews and current product imagery.

The ticket-and-window logo is abstract artwork. Product travel times are indicative; check dated timetables when planning a journey.
